

Sr. No.	GUI Description	Actual Value	Expected Value	Status/Remarks	Screenshots
1	Verify Home Page layout and alignment	All UI elements (header, search box, offer banners) are properly aligned.	All sections, icons, and buttons should be properly aligned without overlap.	Passed	
2	Verify font readability	Fonts are clear and readable across headings and body text.	Font size, style, and colour should be consistent across the application.	Passed	
3	Verify Search Bar UI	"Where are you going?", Check-in/Check-out date field, and Guests selector are displayed correctly.	Search bar fields should be properly aligned with placeholder text visible.	Passed	
4	Verify Button appearance	Sign in, Continue with email, Search, and See availability buttons are properly displayed.	Buttons should have consistent size, colour, and alignment.	Passed	
5	Verify Image clarity and alignment	Property photos, destination banners, and offer images are displayed correctly.	Images should be clear, properly aligned, and not distorted.	Passed	
6	Verify Dropdown and Filter UI	"Sort by", "Popular filters", and price range slider are displayed correctly.	Dropdowns/filters should open properly and all options should be aligned.	Passed	
7	Verify Error Message display	Validation message appears when search is performed without a destination.	Error messages should be clearly visible, readable, and properly formatted.	Passed	
8	Verify Icons and Navigation Bar	Stays, Flights, Car rental, Attractions, Airport taxis tabs and Profile icon are properly displayed.	Icons/tabs should be visible, aligned, and clickable.	Passed	
9	Verify Responsive UI	UI remains intact at different zoom levels and screen resolutions.	No overlapping, clipping, or broken layout should occur.	Passed	
10	Verify Overall UI consistency	Colours, spacing, headings, and controls are consistent across pages.	Entire application should maintain a uniform and attractive interface.	Passed
