Bug Summary Table	8

Bug Report 1

System allows user to select a past pickup time for the current date.

Bug ID	PHP-BUG-001
Bug Title	System allows user to select a past pickup time for the current date.
Module	Car Rental
Severity	Medium
Priority	High
Precondition	Current system date is 02 July 2026 and current time is later than 08:00 AM.
Steps to Reproduce	1. Open https://phptravels.net 2. Navigate to Car Rental. 3. Select Pickup Date = 02 July 2026. 4. Select Pickup Time = 08:00 AM. 5. Click Search.
Expected Result	The application should prevent users from selecting a past pickup time or display an appropriate validation message.
Actual Result	The application accepts the past pickup time without displaying any validation message.
Status	Open

Screenshot Evidence

Bug Report 2

Incorrect validation message displayed when Password field is left blank.

Bug ID	PHP-BUG-002
Bug Title	Incorrect validation message displayed when Password field is left blank.
Module	User Registration
Severity	Low
Priority	Medium
Precondition	User is on the Sign Up page.
Steps to Reproduce	6. Open the Sign Up page. 7. Fill First Name, Last Name and Email. 8. Leave Password blank. 9. Enter any value in Confirm Password. 10. Observe the validation message.
Expected Result	The application should display: "Password is required."
Actual Result	The application displays "Error Password Mismatch" even though the Password field is empty.
Status	Open

Screenshot Evidence

The screenshot shows the sign-up page of PHPTRAVELS. The form fields are: First Name (vansh), Last Name (awasthi), Email Address (awasthi.vansh54321@gmail.com), Password (blank), Confirm Password (filled with dots), and Security Check (87). A red error message "Error Password Mismatch" is displayed below the Confirm Password field. The "Create Account" button is green and visible at the bottom.

Bug Report 3

Registration form clears entered data without displaying a proper validation message.

Bug ID	PHP-BUG-003
Bug Title	Registration form clears entered data without displaying a proper validation message.
Module	User Registration
Severity	High
Priority	High
Precondition	User is on the Sign Up page.
Steps to Reproduce	11. Open the Sign Up page. 12. Fill the registration form. 13. Enter invalid values in the Name fields. 14. Click Create Account.
Expected Result	Display an appropriate validation message and retain the entered information for correction.
Actual Result	The form clears/reloads without displaying any meaningful validation message, causing the user to lose all entered information.
Status	Open

Screenshot Evidence

The screenshot shows the PHPTRAVELS website interface. The browser address bar displays the URL: <https://phptravels.net/invoice/esim/89281577>. The page header includes the PHPTRAVELS logo, navigation links (Services, Company, Blogs), and user options (USD, EN, Login, Signup). The main content area is titled "Home > eSIM Invoice #89281577".

The invoice is divided into two main sections: "Invoice Details" and "Payments Summary".

Invoice Details:

- Booking Information:** Invoice ID: #89281577, Booking Date: 02 Jul 2026, 00:00, Module: eSIM.
- Customer Information:** Name: vansh awasthi, Email: xyz@gmail.com, Phone: 8853279921.
- SIM Package:** Package: 20 GB - 365 days, Data: 20 GB, Order Type: Sim, Country: Armenia, Validity: 365 days, Quantity: 1.

Payments Summary:

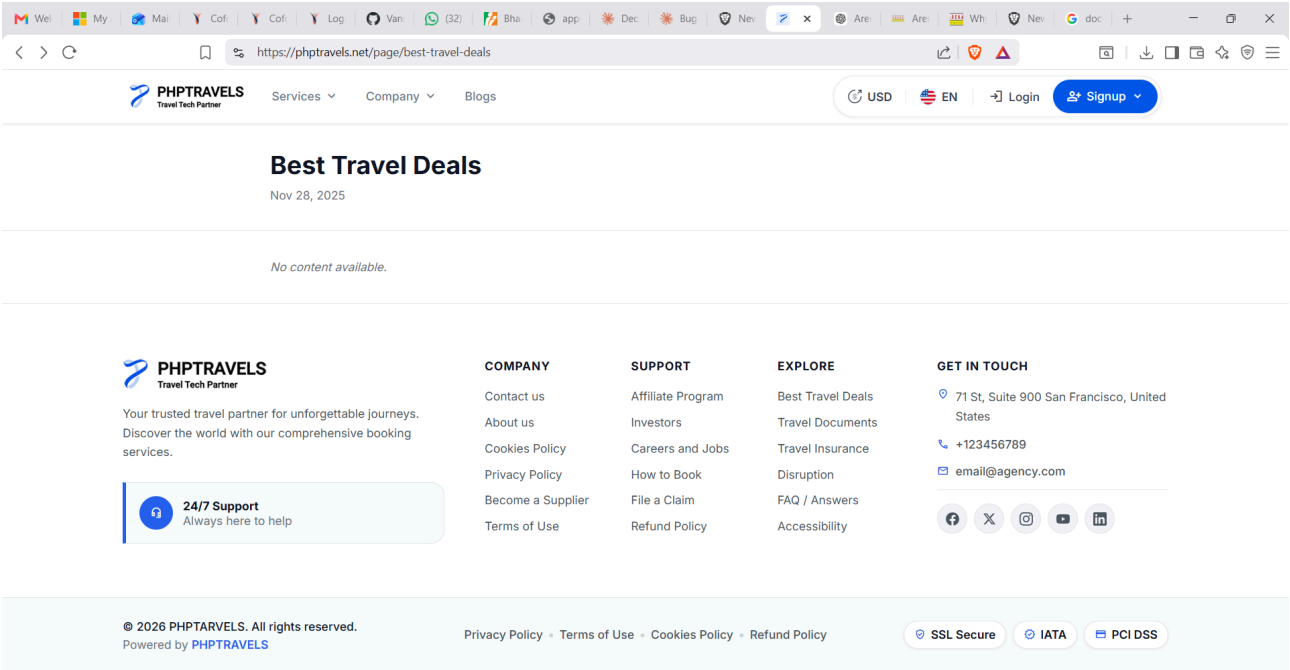

- Booking Status:** Pending
- Payment Status:** Unpaid
- Subtotal:** USD 67.00
- TAX:** USD 0.00
- Total Amount:** USD 67.00
- Payment Gateway:** Pay Later (Pay Later)
- Actions:** Download Invoice, Resend Invoice to Email, Request Cancellation, Back to Homepage.

Bug Report 4

Best Travel Deals page displays no content.

Bug ID	PHP-BUG-004
Bug Title	Best Travel Deals page displays no content.
Module	Content Management
Severity	Medium
Priority	Medium
Precondition	User is on the PHPTRAVELS homepage.
Steps to Reproduce	15. Open https://phptravels.net 16. Navigate to Explore → Best Travel Deals.
Expected Result	The page should display travel deals, promotional offers or relevant content.
Actual Result	The page displays “No content available.” No travel deals or useful information are displayed.
Status	Open

Screenshot Evidence

Bug Report 5

Registration form accepts numeric values in the First Name and Last Name fields without proper validation.

Bug ID	PHP-BUG-005
Bug Title	Registration form accepts numeric values in the First Name and Last Name fields without proper validation.
Module	User Registration
Severity	Medium
Priority	High
Precondition	User is on the Sign Up page.
Steps to Reproduce	17. Open https://phptravels.net/signup 18. Enter 1231424 in First Name. 19. Enter 123444 in Last Name. 20. Fill all mandatory fields. 21. Click Create Account.
Expected Result	The application should reject numeric values in the First Name and Last Name fields and display an appropriate validation message.
Actual Result	The application accepts numeric values without displaying any validation message.
Status	Open

Screenshot Evidence

The screenshot shows the registration form on the PHPTRAVELS website. The browser address bar displays 'https://phptravels.net/signup'. The form fields are as follows:

- First Name ***: 1231424
- Last Name ***: 123444
